amaiorano@massaudubon.org
Massaudubon.org/shapingevents

This is a FREE Event, light refreshments provided

CM | 1.5

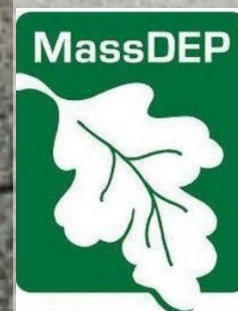

AICP members can earn 12.75 Certification Maintenance (CM) credits for this activity. More information about AICP's CM program can be found at www.planning.org/cm

Building a more sustainable future starts with making choices in your own backyard.

Low Impact Development (LID) is a design approach that maximizes benefits of natural systems, such as flood storage, in areas of a community that are vulnerable to flooding or water quality impairments. Explore examples of LID in Framingham and learn how to adapt to stormwater management challenges from folks who have led their community through this non-traditional development process.
