

# **Salem End Road Bridge Over Stearns Reservoir Bridge Rehabilitation Project**

---

*Neighborhood Meeting*

*City Hall*

*Blumer Room*

*April 29, 2019, 6:30 PM*

# Agenda

- Purpose
- Scope of Work
- Project Area
- Traffic Management
- Anticipated Impacts
- Construction Schedule
- Communication

# Purpose

- Existing bridge was built in 1870
  - Reconstructed 1927
  - Structural Beams degraded to point of replacement
  - Dated Water Main Insulation
  - Substandard Pedestrian Sidewalk
  - Guard Rail currently does not meet MASSDOT standards
- Inspection History – Every two years, ongoing, per MassDOT requirements

# Scope of Work

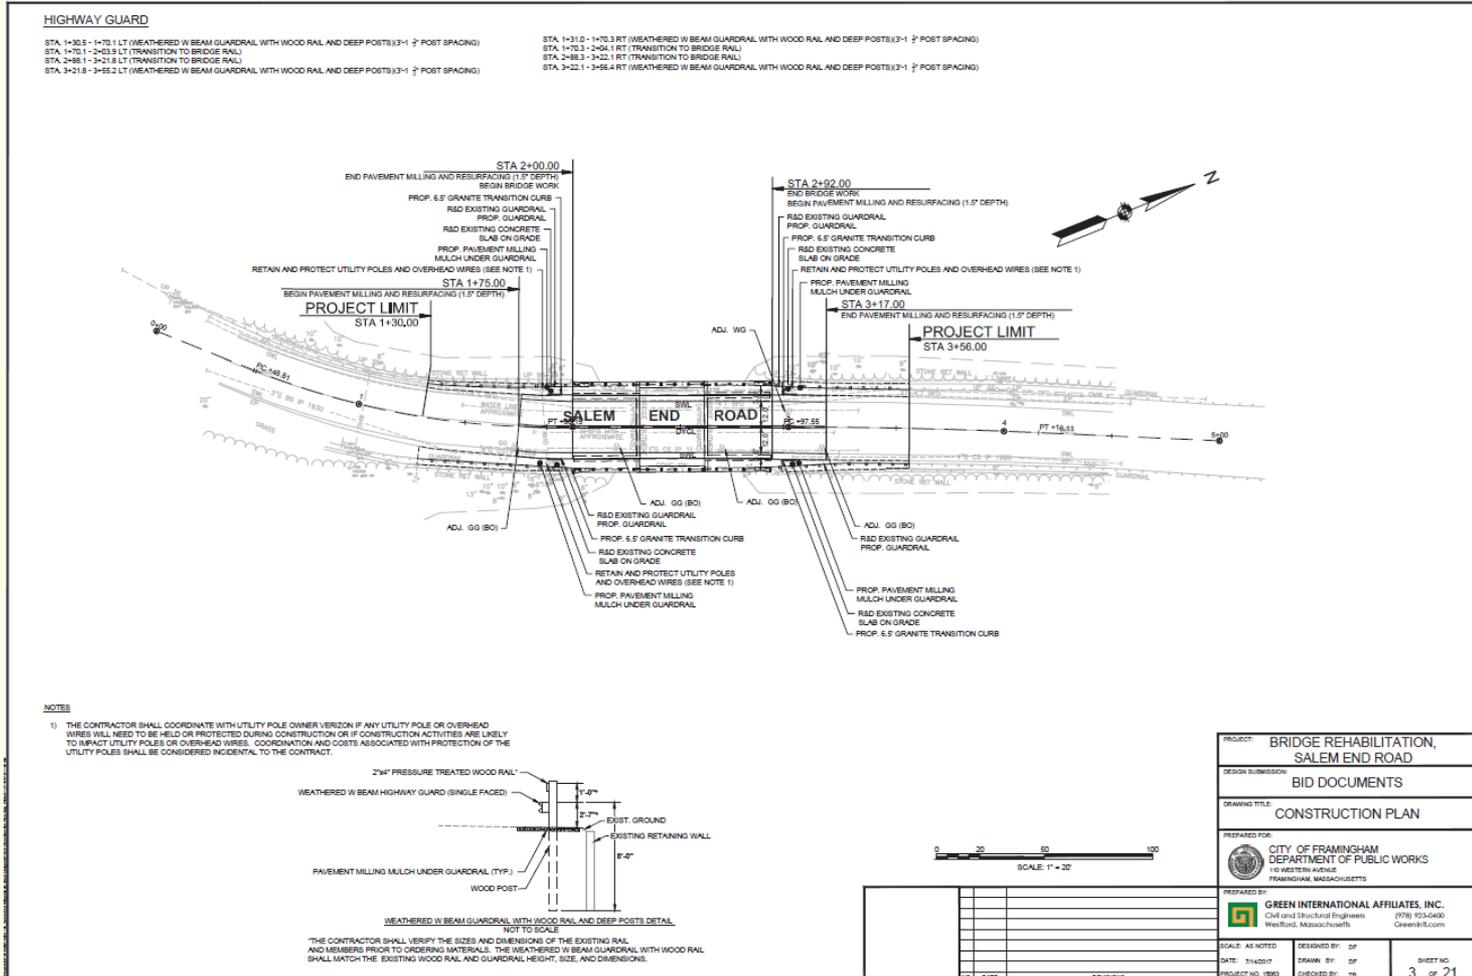

- Implement single alternating traffic lane
- Demolition and Install five (5) beams
- Insulate water main
- Rehabilitate existing pedestrian sidewalks
- Install guardrail
- Install pavement and markings

# Project Area

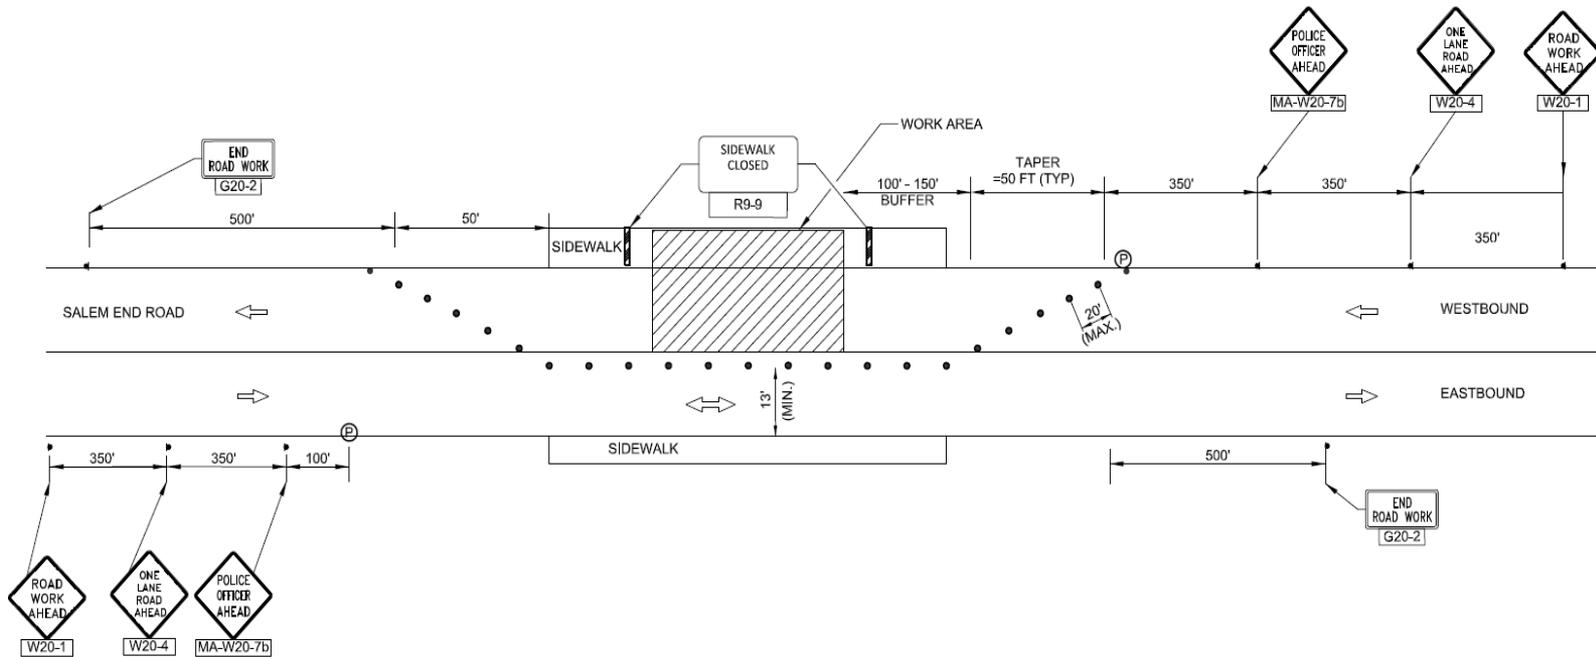

# Salem End Road Bridge Project

- Begin Project May 2019
- Salem End Road
  - Alternating one lane traffic
  - Work Hours 9:30 am-4 pm
  - No pedestrian access
- Traffic management – see following slide

# Traffic Management Plan

TYPICAL APPLICATION - ONE LANE ALTERNATING TRAFFIC

NOT TO SCALE

## Anticipated Impacts

- Traffic Management Plan (TMP) active during work hours until Project completion
- Work hours 9:30 AM to 4 PM Monday-Friday
- One lane of alternating traffic will be provided Monday-Friday, and whole day Saturday and Sunday
- No utility interruptions
- City will distribute notifications in advance of any significant changes
- If access to property is required – **DPW staff will have identification. All personnel CORI checked.**
