

Updated on Saturday, April 25, 2020

The following data analysis provides more information about Framingham residents who have received positive COVID-19 test results. Please note that negative test results are not reported. As a result, the total number of people tested is not available. Access to testing continues to be a challenge for many residents across the Commonwealth. This data analysis is intended to help us better understand the situation at the current time, and guide efforts to mitigate further disease transmission. This analysis is not a predictor of future trends. It will be updated weekly as additional positive cases are reported.

OVERVIEW

**Confirmed
COVID-19 Cases**

632

**Deaths of Confirmed
COVID-19 Cases**

14

**Nursing Homes & Skilled
Nursing Facilities With
Known COVID Cases**

5

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, U.S. Census Bureau: Age and Sex Population Estimates 2010-2018, version 2018; Tables and Figures created by the Framingham Department of Public Health

Note: all data are cumulative and current as of 8:00 am on the date at the top of the page for all statistic

Cases & Deaths by Race/Ethnicity

The following caveats apply to these data:

1. Information on race and ethnicity is collected and reported by laboratories, healthcare providers and local boards of health and may or may not reflect self-report by the individual case.
2. If no information is provided by any reporter on a case's race or ethnicity, MDPH classifies it as missing.
3. A classification of unknown indicates the reporter did not know the race and ethnicity of the individual, the individual refused to provide information, or that the originating system does not capture the information.
4. Other indicates multiple races or that the originating system does not capture the information.

Note: COVID-19 testing is currently conducted by dozens of private labs, hospitals, and other partners and the Massachusetts Department of Public Health is working with these organizations and to improve data reporting by race and ethnicity, to better understand where, and on whom, the burden of illness is falling so the Commonwealth can respond more effectively. On 4/8, the Commissioner of Public Health issued an Order related to collecting complete demographic information for all confirmed and suspected COVID-19

Cases by Race/Ethnicity

Deaths by Race/Ethnicity

■ Hispanic ■ Non-Hispanic White ■ Non-Hispanic Black/African American ■ Non-Hispanic Asian ■ Non-Hispanic Other ■ Unknown/Missing

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, Tables and Figures created by the Framingham Department of Public Health.

Nursing Homes and Skilled Nursing Facilities with Known COVID Cases

Facility	Number of Confirmed Cases
Bethany Health Care Center	0
Carlyle House	10-30
Casa de Ramana	>30
Oak Knoll	<10
St. Patrick's Manor	>30

Data Sources: COVID-19 Data provided by the Bureau of Infectious Disease and Laboratory Sciences, Tables and Figures created by the Framingham Department of Public Health.

Note: This list includes Nursing Homes, Rest Homes, and Skilled Nursing Facilities with at least 2 reported COVID-19 cases to date (residents only). Assisted living residences are not currently included. The number of cases for a facility relies on the amount of testing conducted. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have been tested, not necessarily low prevalence.
