

# Making the network as *Strong* as the communities it serves

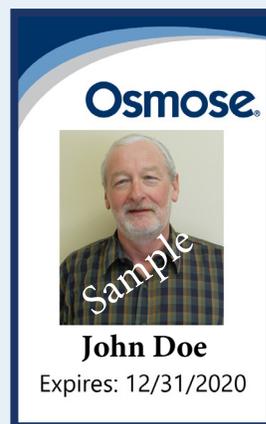

Osmose Utilities Services has been contracted by **Verizon** to inspect utility poles in the area.

The inspection program is designed to ensure the safety and reliability of the electric and communication system. If necessary, Osmose may place additional pole support or place identification for pole replacement.

Osmose may require access to the pole if it is located on private property, behind a closed gate, etc. Unless required for direct access, Osmose will not need to enter a residence or residential buildings.

We appreciate your support during this process.

Osmose employees will be in Osmose branded vehicles, wearing branded safety attire and ID badges.

The person identified on the front of this card is an employee of **Osmose Utilities Services, Inc.**, an international utility contractor headquartered in Peachtree City, Georgia. For employment verification, please call **770-632-6739**.

Osmose field crews offer many specialized contract services to utility companies throughout the United States and abroad which include, but are not limited to:

- Inspection, remedial treatment, and restoration of wood utility poles
- Global Positioning System (GPS) mapping
- Electrical steel tower assessment, maintenance, and restoration
- Padmounted transformer inspection and maintenance
- Utility equipment inventory and data collection
