- **Since Monday, two residents have tested positive, and two more have recovered from COVID-19:**  
The number of people in the City who have tested positive for COVID-19 is 8,351. With 8,019 recovered and 250 fatalities, Framingham currently has 82 active cases. The Framingham Health Department contacts the people who were potentially exposed and the owners of the businesses or places of employment where the potential exposures occurred to inform and counsel them on next steps (contact tracing). The Health Department is working in the State's database to update the status of cases in quarantine, so the number is accurate. Once that work is complete, the City will report on the number of cases in quarantine.
- **Beginning Thursday, June 24, free COVID-19 vaccinations will be offered at the Project Beacon Drive-thru Testing Site in Framingham:**
